

Application Drawing for Condenser Fan Step Controller using CF110

Description:

JTL Step Controller comprising 8 opto-isolated mains digital inputs and 7 suppressed non-changeover relay outputs. A JTL Maintenance Unit is used to configure this product.

THIS IS AN UNCONTROLLED COPY - UNLESS STAMPED WITH CONTROLLED COPY STAMP

NOTES:

- Input states as follows:
Closed contact = Running/Auto
Open contact = Not Running/No Auto
- CON7 must have neutral connected to it.
- To ensure that internally fitted suppressors work correctly, connect line voltages to terminals prefixed LN and the corresponding loads to terminals prefixed LD. Ensure neutral is connected to terminal marked N. CON8 'N' must have neutral connected to it.
- Switch positions DIP switch SW1 controls the output relays if the on board processor fails
Switch closed (ON) = corresponding output relay energised.
- Controller must be configured using a JTL Maintenance Unit.
