

Special days can be added to the relative lighting timer channel; as special days the lighting will not operate. Special days are added by setting a day and month. Screenshot 3 shows that currently one special day is set at Colindale for 25/12 so lights will not operate on this day. Relative timers have many different number depending on vintage. Usually 41, 91, 100.1, 200.1, 300.1, 400.1, 500.1 etc.
